# PBX Push to Open

## 4-1/2" SQUARE ALL-ACTIVE PUSH PLATE SWITCH

### FEATURES

- Large, easy-to-operate all-active switch
- Any part of faceplate activates the device
- Meets ADA requirements — 4-1/2" square
- Flush mount — no surface backbox required
- Brushed 304 stainless steel faceplate
- Microswitch: UL/CSA approved, 15A @ 30V DC
- Available: Push to Open (blue) / Push to Lock (red)
- Concealed or exposed mounting screws
- Plastic spacers & rubber dampers included

### DESCRIPTION

Heavy-duty, ADA-compliant all-active push plate switch with brushed 304 stainless steel faceplate. Flush mounts to a standard single-gang electrical box — no surface backbox required, delivering a clean and professional finish. The all-active design means any point of contact on the faceplate activates the switch, minimising actuation force. Compatible with the Relay Master v6.5 — simply connect 6 colour-coded wires as per the wiring diagram. Eliminates messy toggle switches, cutting installation time in half.

### DIMENSIONS
